

A leader in undergraduate education, the Henry M. Rowan College of Engineering is consistently ranked a top #25 program, out of more than 200 programs in its category, by *U.S. News and World Report*.

The college offers bachelor's, master's and doctoral degrees, supports a cutting-edge research mission, and recently completed over \$80 million dollars of enhancements to our academic facilities.

Rowan's focus on undergraduate education ensures small class sizes, and express opportunities for students to work directly with full-time members of the faculty.

In 2019, 94% of our graduates received job or graduate school placement.

Surveying Engineering Technology Program

Recognizing an increasing demand for professional land surveyors, Rowan University (RU), the Rowan College of South Jersey (RCSJ), and the New Jersey Society of Professional Land Surveyors have collaborated to create an exciting new degree program.

RCSJ maintains a successful history of educating credentialed technicians through their land surveying program. Through the 3 + 1 degree completion program partnership between RU and RCSJ, students now have a pathway toward a bachelor's degree from RU. Students will complete the associate degree track at RCSJ, then transfer into the B.S. program at RU

The program will be housed and operated from the RCSJ campus in Deptford, New Jersey. Students looking for a residential college experience will be able to participate in Rowan Choice, where they live in the University's housing facilities in Glassboro and are able to participate in student life at both institutions.

About Rowan University

Rowan University is a Carnegie-classified national doctoral research institution dedicated to excellence in undergraduate education. It offers bachelor's through doctoral and professional programs to 19,500 students through campuses in Glassboro, Camden, and Stratford, New Jersey.

In addition, the University has extensive collaborations with regional colleges to create seamless, affordable and effective pathways for degree completion. The University has earned national recognition for innovation; commitment to high-quality, affordable education; and developing private public partnerships.
