

FREE PROGRAM FOR  
HIGH SCHOOL STUDENTS

July 13—25, 2025

## National Summer Transportation Institute at Rowan University

Are you a New Jersey high school student interested in learning more about transportation engineering and the ways in which it impacts our world and society? The National Summer Transportation Institute will introduce you to all aspects of transportation engineering, such as roads, rails, air, safety and mobility. The program is designed to engage you in a broad range of activities that provide insight into how engineers plan, design and operate safe transportation systems.

This program is funded by the Federal Highway Administration, the New Jersey Department of Transportation and Rowan University and is FREE of charge to eligible students. On-campus room and board and lab supplies are included in the scholarship award.

### PARTICIPANTS WILL:

- Get invaluable insight from professional engineers in government agencies and industries about the different aspects of transportation
- Tour sites and facilities not normally accessible to the general public
- Engage in hands-on engineering lab activities that help you better understand the engineering behind designing safe transportation systems
- Meet fellow local high school students who share your interest in engineering
